

ARAX PL-F3 TILT ADAPTER

Operations manual

ARAX tilt adapter allows you use any PL mount lenses on F3 mounted video cameras. It gives the 8 degree tilting possibility of lens and 360 degree rotation. The lens which you can use with this adapter should have ARRI PL (Arriflex, Red One, Canon 5D, 7D). There are no problem with any lenses and infinity focus.

When adapter not tilted, it works like regular adapter ring.

Allows to focus on infinity independently from camera matrix size and crop factor. Has no lens element, so it does not affect optical performance.

Specifications:

- Lens mount: ARRI PL (Arriflex, Red One, Canon 5D, 7D)
- Camera mount: Sony PMW-F3 camcorder
- Tilt angle: from 0° smoothly up to 8°
- Lens rotate: +/- 360° and locks at 12 angles
- Weight: 197 gramm
- Material: Solid Metal
- Manufacturer: Arax, Ukraine

1. Lens and adapter installation. Do it exactly like you do it on camera. Use the handles 3, there are only unmovable parts of adapter.
2. To tilt the lens, rotate the ring 4.
3. To rotate the lens, just rotate the installed lens clockwise or counter-clockwise to any angle. Do it with little force. No any button or pin pushing necessary.
